+ SMART FOCUS ~ 1 SCAN, 5 IMAGES

With Green X 12 you will get high-resolution images of multiple treatment areas with a single shot. With 1 scan, you get 5 different high-resolution images. Three 4x4 images, one 12 x 8.5 image and one Auto PANO image. Other advantages are minimal X-ray exposure to the patients and also less work for staff, which means a faster and more efficient workflow.

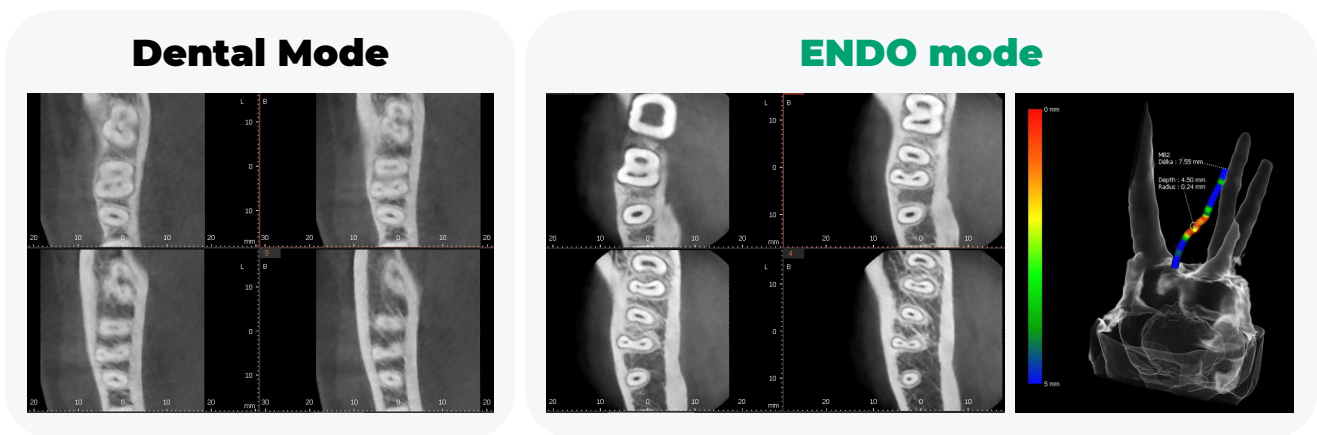

+ MULTI FOV SELECTION

Depending on the purpose of treatment, it is possible to select among 5 types of Multi-FOV from 4x4 to 12x8.5 cm with low dose. You can also get 12 x 14 images with Double Scan function to get optimal information for diagnosis of the entire dental arch, including the TMJ.

4x4	8x5 / 8x8	12x8.5	12x14*
Endo & Single implant	Arch	Dual Arch	Sinus & TMJ * Stitching

+ ENDO MODE WITH THE HIGHEST RESOLUTION

With its 4 cm x 4 cm volume mode and 49.5 micron voxel size, the Endo mode will optimize treatment of highly-focused regions of interest. It is ideal for endodontic use because the dentist is able to achieve an extraordinary image in a high-resolution voxel size.

+ INSIGHT 2.0 / FREE FOV

The Insight Pan is capable of taking a multilayered panoramic image, called an Insight Pan, which provides a unique in-depth look across a single focal trough. Insight 2.0 has an upgraded free FOV feature so you will be able to capture just the area of interest.
